

Certified Landscape Irrigation Auditor Training Manual

November 2013

The European Irrigation Association

The European Irrigation Association is a non-profit trade organization representing the irrigation industry at the national and international level. Its primary purpose is to provide members with comprehensive programs and services to help them keep pace with the rapidly changing technology of the industry. The EIA is dedicated to serving the needs of its members and to helping shape the future of irrigation.

Members include manufacturers, distributors, dealers, contractors, manufacturers' representatives, professional irrigation consultants, and individuals representing all segments of the industry in the agricultural and landscape/turf fields.

For further information about the Irrigation Association or any of its educational and certification programs, please contact the EIA.

EIA is a non-profit organization registered in Belgium under the name European Irrigation Association, with the enterprise number 53.49.44.607.
